PROFILE

BCA (Hons.) in Cybersecurity graduate, with a strong foundation in programming (Python, JavaScript), databases (Oracle SQL, MySQL), and web technologies (HTML, CSS). Seeking software or Python Full Stack Developer role to apply my technical skills and grow through real-world development experience.

INTERNSHIP

Cybersecurity Intern • Fidrox Technologies Pvt. Ltd. • January, 2026 – May, 2026

- Conducted Vulnerability Assessment and Penetration Testing (VAPT) on Vulnweb and lab environments using Burp Suite Pro and Nessus Professional.
 - Prepared VAPT reports with risk assessment, proof of concept findings, and remediation recommendations.
 - Gained hands-on experience with MobSF, Active Directory (AD), Nmap and Nessus.
-

EDUCATION

Bachelor of Computer Application Hons. in Cybersecurity 2022 - 2026
• Chanakya University | CGPA - 9.71

PROJECTS

WhatsApp UI/UX Redesign (Desktop) Jan 2025 - Jun 2025

Redesigning WhatsApp Desktop using UI/UX design tools (Figma) to improve accessibility, streamline navigation, and enhance aesthetics through mockups and prototypes.

Cloud Logging and Threat Monitoring Project Mar 2025 - Jun 2025

Developed a security monitoring system using AWS CloudWatch to monitor SSH login attempts on EC2 instances, with alarms configured via metric filters to detect unauthorized access.

TECHNICAL SKILLS

• HTML

- Knowledge of semantic and non-semantic HTML elements for creating well-structured webpages.
- Understanding and usage of global and element-specific attributes in HTML.
- Experience working with tables, forms, and multimedia elements such as audio and video.
- Ability to create structured and responsive web pages using HTML5.

• CSS

- Knowledge of CSS selectors, pseudo-classes, pseudo-elements, and combinators
- Understanding of the CSS box model, display properties, position properties, and filter properties.
- Knowledge of CSS animations and transitions for creating interactive and visually appealing web pages.

Note: Created static web pages using HTML and CSS like Blinkit, Amazon , Knightbite, Biryani by kilo, Facebook and Netflix.

• Javascript

- Basic understanding of functions, arrays, objects, and their usage in JavaScript.
- Knowledge of ES6 features including let/const, arrow functions, and destructuring.
- Experience performing dynamic web page operations using DOM manipulation and event handling.
- Understanding of Promises and asynchronous operations for fetching and processing data from APIs.

Note: Created dynamic projects like generating OTP, calculator, digital clock, stopwatch using HTML, CSS and JavaScript.

EXTRACURRICULAR ACTIVITIES

- Presented on the topic "Hosth"(ritual of coastal karnataka) at the International IKS Conference and received a certificate for participation.
- NCC B certificate Holder
- Won 2nd Prize in Geeks for Geeks Hackfest 2026 and qualified for final round.
